

AUTOMATIC POLYSTYRENE CUTTING BRIDGE

Référence : FTM242

Automatic threading and vertical multi-wire cutting.

Description fonctionnelle :

- Variable introduction speed
- Automatic centering of the 4-point block
- Electronic heating regulation by phase angle
- Top hold for cutting up
- Dynamic case detection of thread
- Controlling the displacement of the bridge during cutting
- Touch control interface and production monitoring
- Manufacturing change by recipe system.

Description technique :

20 wires, automatic distribution (20 wires in 3 min) Cutting capacity 1300 x 1300 x 6000mm Finished product length from 30 to 6000mm (- / + 0.5mm) Variable cutting speed from 0.5 to 3m / min Conveyor with removable rollers 8m
